

FAIRway actions on the Danube – a success story from Croatia

FAIRway Danube pilot activities are continuing to provide best results even in times of the global Covid-19 crisis. Croatian project partner conducted following activities in the year (2020):

Implementation of national WAMS in Croatia

Hard work always results in great achievements – this year showed us that not even difficult time can stop reaching awaited implementation of national WAMS.

After 6 months of implementation (January – July 2020) developed system collects, stores

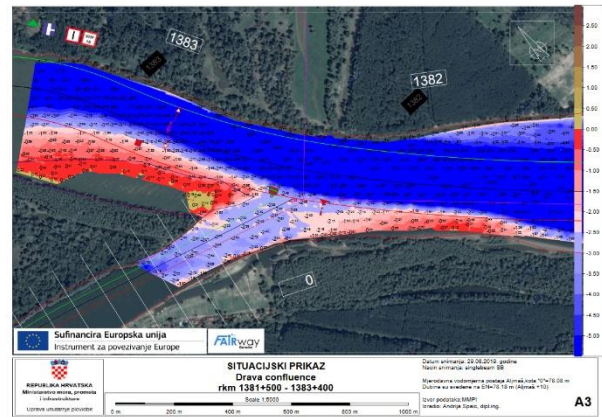

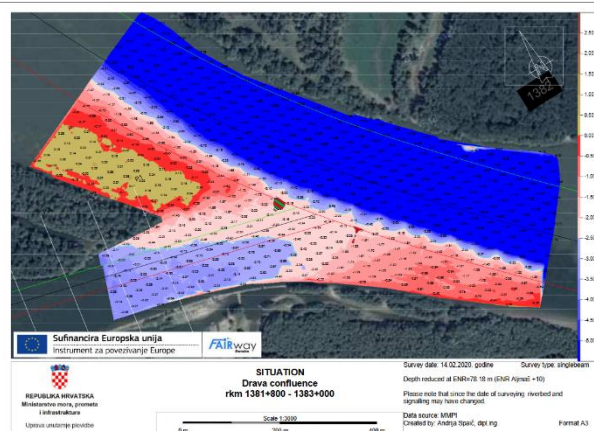

and

systematizes information about the waterway, morphology, critical areas, hydrographic measurements which will help Croatian Ministry in planning of waterway maintenance measures and waterway management.

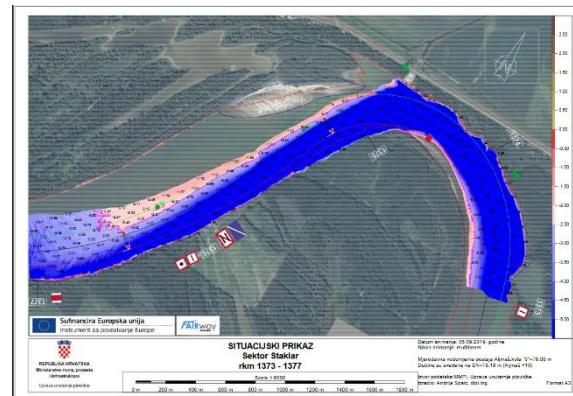

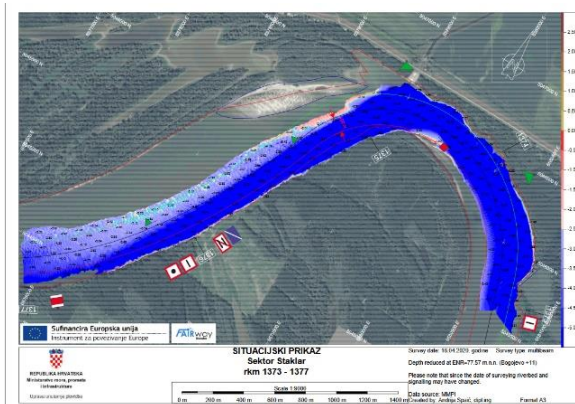

Surveying actions in Croatia

Using the new surveying vessel "Connecting Europe 1", 9 critical locations have been detailed surveyed and results are provided to waterway users. Detailed information can be found on following link: <https://www.vodniputovi.hr/plovidba/kriticni-sektori/>
